In Bunker Punks, you'll go on a high-speed, wickedly challenging adventure, traveling back in time to the 80s to save the president from an evil mastermind and his nefarious plans, while fending off a host of nefarious enemies on the way! This is the story of our protagonist K.R.S. and his buddies; they set off on their time-traveling, high-speed adventure to save their President from an evil, time-traveling ex-Nazi. Unfortunately, K.R.S. leaves his date and his fellow punk kids at home. Bunker Punks is a fast, high-speed, high-stake adventure/platformer, that will make you laugh and wince at the same time. The retro-style graphics mixed with the light-hearted art style brings back old memories. The gameplay and the puzzles in the game are tightly bound together, making the game never too easy or too hard. The game is also packed with goofy references, vintage arcade games and even a couple of shoutouts to the work of Charlie Chaplin, who was a big fan of the silent movies. A time travelling action-puzzle adventure? You bet. Bunker Punks is packed with an arsenal of wacky weapons and super-cool sounds. We want to give you one of the most high-tech soundset on mobile, putting you in the heart of the action. K.R.S. is also equipped with a badass, rechargeable laser gun, perfectly complementing the retro-style graphics, which we want to make you smile as you play the game. Like the classic arcade games you grew up on, you'll have to manage your time, trying to beat the clock before facing the infamous D-Man or running out of oxygen. But you won't just be traversing buildings and dodging nasties: you'll also have to deal with the hopelessly inept D-Man, and his desire to hack into your brain. It's a tough time! Bunker Punks is for the most part a platformer, with K.R.S. running from the police at high speeds through futuristic skylines and into buildings. It's a simple enough formula, but finding an open window and entering it is the easy part. Inside, you'll have to manoeuvre obstacles and avoid obstacles, such as blimps and bouncing boxes, whilst collecting as

**ing Wednesday, August 10, 2010 The history of Bell Labs is often viewed as one of the most successful recording and recording technology companies in the world. No single person other than Bill Wilkinson had more to do with the creation of the MVTR - and subsequent development of the first and subsequent universal realtime 8 and 16 track recorders. He was a force in what was needed to develop all of the technology that went into the ENGCAM system and the MG system. He worked with David Robinson, as well as Bob Wobig, in the development of multi-layer samplers to alter the MCU as per plan, and Robin Welch to automate the overlap capture of drums and the realtime tagging of MCU tracks to link them. All of these requests to David Robinson and the Bell Labs crew at the time were supported by Bill Wilkinson..class
